PROFESSIONAL SUMMARY

Quality Assurance Analyst II with experience supporting enterprise insurance applications across Guidewire PolicyCenter, BillingCenter, ClaimsCenter, and ProducerEngage. Experienced in release validation, regression testing, User Acceptance Testing (UAT), defect management, workflow validation, and Agile delivery. Demonstrated success supporting monthly production releases and more than 15 enterprise projects across multiple insurance product lines.

KEY ACHIEVEMENTS

- Supported monthly Guidewire production releases through release validation, regression testing, and business workflow verification.
- Contributed to the successful testing and delivery of 15+ enterprise projects.
- Facilitated QA scrum ceremonies twice weekly.
- Created and executed UAT scenarios for major releases and system enhancements.
- Recognized for identifying the highest number of software defects during sprint testing efforts throughout the year.
- Validated Homeowners, Personal Auto, Commercial Auto, Farm & Ranch, Inland Marine, and Umbrella insurance products.

TECHNICAL SKILLS

Guidewire: PolicyCenter, BillingCenter, ClaimsCenter, ProducerEngage
Quality Assurance: Functional Testing, Regression Testing, UAT, End-to-End Testing, Test Planning, Test Case Design, Defect Management, Release Validation, Requirements Analysis, Workflow Validation
Tools: Jira, Mabl, SQL, Microsoft Excel
Methodologies: Agile, Scrum, STLC

PROFESSIONAL EXPERIENCE

Texas Farm Bureau Insurance

Quality Assurance Analyst II | 2024 - Present

- Lead quality assurance validation efforts for monthly Guidewire production releases and enterprise application enhancements.
- Design, execute, and maintain regression testing coverage across PolicyCenter, BillingCenter, ClaimsCenter, and ProducerEngage.
- Develop User Acceptance Testing (UAT) scenarios and coordinate business validation activities for major releases.
- Validate insurance workflows supporting Homeowners, Personal Auto, Commercial Auto, Farm & Ranch, Inland Marine, and Umbrella product lines.
- Identify, document, prioritize, and track software defects using Jira while partnering with developers through resolution and retesting.
- Facilitate QA scrum ceremonies twice weekly and support Agile delivery practices.
- Support test automation initiatives using Mabl to improve regression coverage and testing efficiency.

Policy Analyst | Apr 2023 - 2024

Supported policy administration operations, analyzed policy transactions and workflows, collaborated with stakeholders, and developed expertise in Guidewire InsuranceSuite platforms.
